

SUDHEESH SREENILAYAM

AI Technical Program Manager

Orchestrating Operational Intelligence through Agentic Workflows, Data Strategy, & Global System Ownership

Chicago, Illinois | +1 (312) 868-9096

✉ sudhisreenilayam13@outlook.com **in** [linkedin.com/in/ssudheesh](https://www.linkedin.com/in/ssudheesh)  github.com/Sudheeshsreenilayam

Summary

Strategic Operations Leader with **8+ years** of experience supporting global Fortune 1 clients (Amazon). I bridge the gap between deep managerial expertise (overseeing **200+ FTEs**) and AI-native data automation. Specialized in the Technical Ownership of complex data environments and the orchestration of Agentic AI workflows to drive operational intelligence, leveraging automated ETL pipelines that reduce operational waste by **\$900K** annually.

Technical Skills

Programming & Databases: SQL (PostgreSQL, BigQuery, Snowflake, SQL Server), Python (Pandas, NumPy), R
Data Engineering: dbt, Git LFS, DVC, Databricks, Supabase (PostgreSQL), Microsoft Access
Data Visualization: Power BI, Tableau, MS Excel (Advanced: VBA, Macros, Power Query), Google Looker Studio
Business & Strategy: Business Intelligence & Forecasting, KPI/SLA Definition, Lean Six Sigma Green Belt, Agile/Scrum

Work Experience

Senior Associate Manager, SDM & Operations Analytics

Sep 2023 – Aug 2024

Sutherland Global Services

Kerala, India

- **Waste Mitigation:** Spearheaded the strategic mitigation of operational waste as measured by a projected **\$900K in annual savings** and the resolution of a **66% defect rate** across 500k+ monthly support tickets, by engineering the "Driver Self-Service" resolution engine framework via SQL and Power Query.
- **Reporting Modernization:** Engineered the modernization of departmental reporting as measured by a **40% improvement in reporting efficiency** and reduced manual data latency, by deploying automated KPI dashboards in Power BI across the delivery center.
- **Capacity Planning:** Optimized global staffing as measured by a significant reduction in overtime cost overruns, by developing and deploying predictive workforce forecasting models in Excel to align workforce availability for **200+ FTEs**.

Associate Manager, Operations & Process Improvement

Dec 2021 – Aug 2023

Sutherland Global Services

Kerala, India

- **Statistical Process Control:** Spearheaded a significant increase in operational efficiency as measured by a **2.73% gain in throughput**, by leading a cross-functional "Efficiency Task Force" that utilized Minitab and Excel to perform hypothesis testing on service bottlenecks.
- **Resource Management:** Restructured operational expenditure as measured by a **15% reduction** in team overtime costs, by engineering and deploying a predictive staffing allocation algorithm and workforce model using advanced Excel to balance shift coverage for **90+ FTEs**.

Lead, Service Delivery Management

Dec 2019 – Nov 2021

Sutherland Global Services

Kerala, India

- **Service Design & A/B Testing:** Influenced enhanced customer satisfaction as measured by a **16% improvement** in First Call Resolution (FCR) rates, by designing and conducting rigorous A/B tests on customer service scripts to statistically validate effective communication strategies.
- **Trend Analysis:** Mitigated service failures as measured by a **30% reduction** in customer complaints and escalations, by performing quantitative trend analysis to identify root causes and implement targeted process improvements.

Early Career (Promoted from Associate to Senior SME)

Jun 2016 – Nov 2019

- **SLA Compliance:** Secured flawless service delivery as measured by **100% SLA compliance**, by developing real-time monitoring reports using Excel Power Query to identify service bottlenecks.
- **Performance Leadership:** Elevated front-line performance as measured by a **2.4% increase** in team efficiency and 7 consecutive "Best Team Leader" recognitions, by leading a pilot team of 20 representatives and implementing the DIRECT feedback framework.

Strategic Projects & Innovation

Superstore Profitability & Strategic Recovery | *Python, SQL, Power BI*

- **Financial Optimization:** Developed a 90-day execution plan identifying **\$218K** in annual business recovery; leveraged regression to prove internal discounting was the primary loss driver, proposing a **15% hard cap** to secure **\$106K** in margin gain.

Chicago 311 Accountability Dashboard | *Python, GitHub Actions, React, D3.js*

- **Data Pipeline Architecture:** Architected a cost-efficient "Static-Site Data Orchestration" system to automate nightly ETL pipelines processing millions of records from the Chicago Open Data Portal to investigate urban service inequities.

Education

Master of Science in Business Analytics
Roosevelt University

May 2026 (GPA: 3.97/4.0)
Chicago, IL

Bachelor of Technology in Electronics & Communication Engineering
CUSAT

India

Certifications

- Lean Six Sigma Green Belt
- Google Data Analytics (In Progress)
